Automated Testing for Continuous Integration

Version 1.0

**Version History**

Version	Date	Handled by	Comments
V1.0	05-June-2019	ZL Chen	Add the software structure.
V1.1	09-June-2019	Yuming Lin	Add the project config to Github.
V1.1.1	11-June-2019	Yuming Lin	Add the test jobs to Jenkins.
V1.2	11-June-2019	ZL Chen	Add the jobs script launch by Jenkins.
V1.2.1	12-June-2019	ZL Chen	Add the test report display.

System Structure:

Structure:
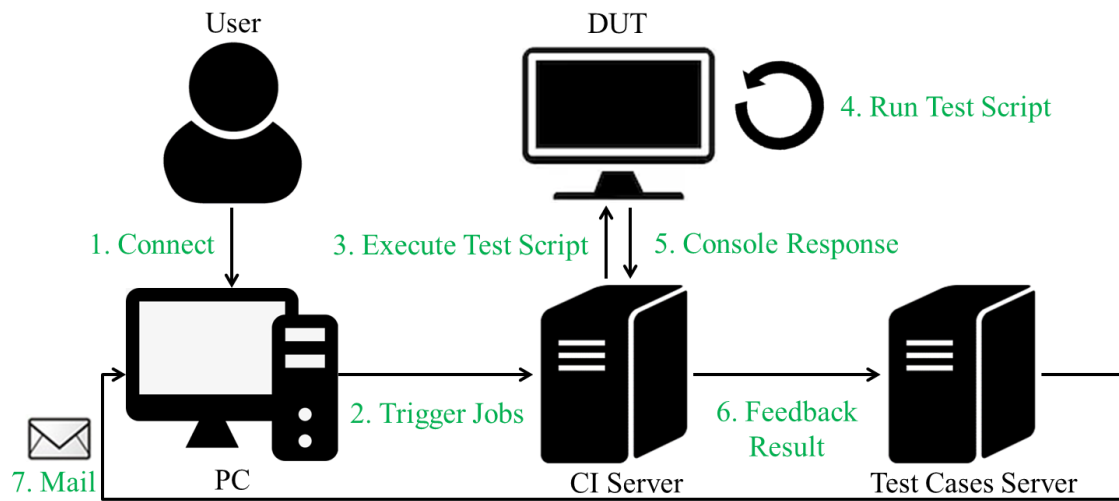

Ongoing:
Precondition Setting:

Please make sure the DUT is connected to the internet.

Please follow the implement as below.

Step 1:

Add the project config to Github.

➢ Please git clone https://github.com/advantech-zl-yuming/ini.git

➢ Please create the three test branch for xxxxxx branch

- ✓ git checkout -b usc130_a8 origin/usc130_a8
- ✓ git checkout xxxxxx
- ✓ git checkout -b usc130_a8_stress origin/usc130_a8_stress
- ✓ git checkout xxxxxx_stress
- ✓ git checkout -b usc130_a8_half_auto origin/usc130_a8_half_auto
- ✓ git checkout xxxxxx_half_auto

usc130_a8_half_auto
usc130_a8_stress
usc130_a8

➢ Please check project components and set components' parameters on 3 test branches (xxxxxx, xxxxxx_stress, xxxxxx_half_auto)

- ✓ Please enable/disable the test module on device_check.ini, and set the components' parameters on parameter_setting.ini

```
# Device Check

[suite_disable]
wifi = disable
eth0 = disable
light_sensor = disable
g_sensor = disable
gps = disable

[suite_enable]
audio_speaker = enable
backlight = enable
bluetooth = enable
camera = enable
comtest = enable
emmc = enable
gpio_key = enable
rfid = enable
rtc = enable
systeminformation = enable
usbdisk_sdcard = enable
androiddm_version_check = enable
boot_animation_check = enable
system_customization_check = enable
video_fps = enable
cpu_info = enable
mem_info = enable
emmc_info = enable
sd_info = enable
usb_info = enable
usb_otg_info = enable
```

```
# Parameter Setting

[project_name]
name = usc130_a8

[audio_speaker]

[backlight]

[bluetooth]

[camera]
id = 2394

[comtest]
port1 = /dev/ttyS4

[emmc]

[eth0]

[g_sensor]
input_id = /sys/devices/virtual/input/input3
name = FreescaleAccelerometer

[light_sensor]
input_id = /sys/devices/virtual/input/input4
name = tsl2563

[gpio_key]
input_id = /sys/devices/platform/gpio-keys/input
```

- ➢ Please push the three branch to github for test.
  - ✓ git push origin xxxxxx: xxxxxx
  - ✓ git push origin xxxxxx_stress: xxxxxx_stress
  - ✓ git push origin xxxxxx_half_auto: xxxxxx_half_auto

Step 2:

Add the test jobs to Jenkins.

- ➢ Login the Jenkins system :
  - ✓ http://172.22.20.208:8080/

    (Username and password is default the same.)

- ➢ Create new project view
  - ✓ Add new xxxxxx project jobs to xxxxxx view

- ➢ Add 5 test jobs to new project to run test
  - ✓ Add auto test jobs to xxxxxx view

    1. Add the auto test config job (Copy from Test_Tools_USC160_Clone_ini_Android)
    2. Enter an item name. ex: Test_Tools_ xxxxxx_Clone_ini_Android
    3. Set the agent base on the connection.
    4. Enter the project config branch name (ex: */xxxxxx)

➢ Add 5 test jobs to new project to run test

    ✓ Add half-auto test jobs to xxxxxx view

1. Add the half_auto test config job (Copy from Test_Tools_USC160_Clone_ini_half_auto_Android)
2. Enter an item name. ex: Test_Tools_xxxxxx_Clone_ini_half_auto_Android
3. Set the agent base on the connection.
4. Enter the project config branch name (ex: */xxxxxx)

✓ Add the stress test jobs to xxxxxx view

1. Add the stress test config job (Copy from Test_Tools_USC160_Clone_ini_stress_Android)

2. Enter an item name. ex: Test_Tools_xxxxxx_Clone_ini_stress_Android

3. Set the agent base on the connection.

4. Enter the project config branch name (ex: */xxxxxx)

✓ Add the download auto tools job and download test APK job to xxxxxx view

Choose the "Test_Tools_USC160_Clone_Automation_Android" and "Test_Tools_USC160_Clone_APK_Android" jobs to the project view to finish 5 test jobs.

AIM-75	All	DQA	Howard	RISC_Android	RISC_Linux	USC-160	X86_Android	X86_Linux	Yuming	ZL	**xxxxxxx**

S	W	Name ↓	Last Success
🔵	☀	Test_Tools_USC160_Clone_APK_Android	6 days 5 hr - #3
🔵	☀	Test_Tools_USC160_Clone_Automation_Android	1 day 4 hr - #73
⚪	☀	Test_Tools_xxxxxx_Clone_ini_Android	N/A
⚪	☀	Test_Tools_xxxxxx_Clone_ini_half_auto_Android	N/A
⚪	☀	Test_Tools_xxxxxx_Clone_ini_stress_Android	N/A

Icon: S M L

Step 3:

Run the jobs script by Jenkins.

The first one:

➢ Please clone the automation folder. (Click the Test_Tools_USC160_Clone_Automation_Android), it will trigger the "Test_Tools_xxxxx_Clone_ini_Android" jobs.

S	W	Name ↓
🔵	⚙	Test_Tools_USC160_Clone_APK_Android
🔵	⚙	Test_Tools_USC160_Clone_Automation_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_half_auto_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_stress_Android

The second:

➢ If you want to use the APK of the test cases, please click the "Test_Tools_USC160_Clone_APK_Android", it will trigger the "Test_Tools_xxxxx_ini_half_auto_Android" jobs.

S	W	Name ↓
🔵	⚙	Test_Tools_USC160_Clone_APK_Android
🔵	⚙	Test_Tools_USC160_Clone_Automation_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_half_auto_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_stress_Android

➢ Then, if you want to run the semiautomatic, please click the "Test_Tools_xxxxx_ini_stress_Android" jobs.

S	W	Name ↓
🔵	⚙	Test_Tools_USC160_Clone_APK_Android
🔵	⚙	Test_Tools_USC160_Clone_Automation_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_half_auto_Android
⚪	⚙	Test_Tools_xxxxxx_Clone_ini_stress_Android

The third,

➢ Join the main project job. (Ex: Test_Tools_xxxxx)

➢ Modify the configuration setting:
  ✓ Agent

  ✓ IP address:port (Device IP Address)

➢ Finally, starting the auto test script.
  ✓ Please click the "Test_Tools_xxxxx".

Step 4:

➢ Basically, the location is under the C:\code\automation\parser_log\backup\

parser_log
